THE APPRAISAL OF CONTENT IS TENTATIVE.
(FOR KEY SEE REVERSE)

1. An artificial fertilizer factory is located approximately eight kilometers north of Szczecin (Stettin) in the direction of Police; it is situated on the bank of the Oder River. The plant can be approached by water in a jetty, approximately 300 meters long, constructed of concrete, approximately two meters above water-level, which is owned by the factory and by a branch railroad which has its own locomotive for shunting cars. A five-ton crane is available for loading and unloading. 25X1
2. The factory employs approximately 500 workers who receive about 560 zloty per month net. The plant produces sulphuric acid and fertilizers. Raw materials are brought to the factory by barges. The fertilizers are dispatched by rail to state farms throughout the country.
3. The factory has one four-story red brick building with a tiled roof which is used for administration offices; one large workshop which houses the sulphuric acid section; one large workshop which houses the fertilizer section; and one large warehouse.
4. The factory is guarded by the WOP (Border Security Guard) which is supervised by several members of the UB (Security Police).
